The Nature of Unemployment in Britain: Studies Of The Dhss Cohort

The Nature of Unemployment in Britain - S. J. Nickell 1989 A contribution to the study of the characteristics and behaviour of the unemployed, especially in their search for work. It is based on the analysis of data on a large cohort of men registering as unemployed in 1978.

Unemployment in Britain Between the Wars - Stephen Constantine 2014-07-30 Drawing on a range of contemporary evidence, Stephen Constantine studies the nature and causes of unemployment in Britain during the 1920s and 1930s, and analyzes the failure of successive inter-war governments to make a constructive response.

The Nature of Unemployment in Britain - Stephen Nickell (Ökonom.) 1989
Interwar Unemployment in International Perspective - Barry J. Eichengreen 1988-04-30

High unemployment has been one of the most disturbing features of the economy of the 1980s. For a precedent, one must look to the interwar period and in particular to the Great Depression of the 1930s. It follows that recent years have been marked by a resurgence of interest amongst academics in interwar unemployment. The debate has been contentious. There is nothing like the analysis of a period which recorded rates of unemployment approaching 25 per cent to highlight the differences between competing schools of thought on the operation of labour markets. Along with historians, economists whose objective is to better understand the causes, character and consequences of contemporary unemployment and sociologists seeking to understand contemporary society's perceptions and responses to joblessness have devoted increasing attention to this historical episode. Like many issues in economic history, this one can be approached in a variety of ways using different theoretical approaches, tools of analysis and levels of disaggregation. Much of the recent literature on the functioning of labour markets in the Depression has been macroeconomic in nature and has been limited to individual countries. Debates from the period itself have been revived and new questions stimulated by modern research have been opened. Many such studies have been narrowly focused and have failed to take into account the array of historical evidence collected and analysed by contemporaries or reconstructed and reinterpreted by historians.

Unemployment in Britain Between the Wars - Stephen Constantine 2014-07-30

Drawing on a range of contemporary evidence, Stephen Constantine studies the nature and causes of unemployment in Britain during the 1920s and 1930s, and analyzes the failure of successive inter-war governments to make a constructive response.
New Estimates of British Unemployment, 1879-1913-George R. Boyer 2001

New Directions in Economic and Social History-Anne Digby 1992-11-25 Based on articles first published in Refresh (Recent Findings in Economic and Social History) this is the second volume in the highly successful New Directions in Economic and Social History which focuses on important and controversial issues in British history during the last three centuries. It discusses recent work showing how new archival material, new methods of analysis and new approaches have changed interpretations. The volume will enable teachers, lecturers and students to keep abreast of current advances in research.

Unemployment in Britain-P. Richard G. Layard 1981

Bad Times-Noel Whiteside 1991

Understanding Unemployment-Eithne McLaughlin 1992 This book argues that unemployment is symptomatic of an inherently inefficient labour market founded on structured inequalities of locality, sex, race and age. It provides a multidisciplinary explanation of why unemployment has been a continuing crisis, suitable for students in many disciplines.

Unemployment in the UK-Jeremy Moon 1985
Unemployment and the state in Britain-Stephanie Ward 2016-05-16 Unemployment and the state in Britain offers an important and original contribution to understandings of the 1930s. Through a comparative case study of south Wales and the north-east of England, the book explores the impact of the highly controversial means test, the relationship between the unemployed and the government and the nature of some of the largest protests of the interwar period. This study will appeal to students and scholars of the depression, social movements, studies of the unemployed, social policy and interwar British society.

British Unemployment 1919-1939-W. R. Garside 2002-06-20 Despite the dominance of unemployment in the historiography of interwar Britain, there is as yet no comprehensive single volume study of government reactions to the problem over the entire period down to 1939. British Unemployment 1919-1939 aims to fill that gap. W.R. Garside draws upon an extensive range of primary and secondary sources to analyze official ameliorative policy toward unemployment and contemporary reactions to such intervention. He assesses the nature and scale of interwar unemployment assistance. Careful study is also made of the impact of unemployment on related areas of economic concerns such as monetary and fiscal policy, industrial change, overseas trade, colonial development, labor supply and the impact of collective bargaining. Comprehensive, informative and clearly written, this book is the fullest account of policy responses to unemployment in the interwar period. It will be invaluable to specialists in recent British economic history and public policy, as well as an essential reference work for students coming to the subject for the first time.

The Economics of Unemployment in Britain-John Creedy 1981
Unemployment and the Insurance Compensation Principle in Britain and Germany - Andreas Cebulla 2001

Nice Work? - Peter Drexler 2002

Unemployment in Britain Between the Wars - Stephen Constantine 1980 Drawing on a range of contemporary evidence, Stephen Constantine studies the nature and causes of unemployment in Britain during the 1920s and 1930s, and analyzes the failure of successive inter-war governments to make a constructive response.

The Politics of Unemployment in Europe - Marco Giugni 2016-03-03 This book offers a state-of-the-art discussion of the political issues surrounding unemployment in Europe. Its unique combination offers both a policy and institutional perspective, whilst studying the viewpoint of individual civil society members engaging in collective action on the issue of joblessness. It is the result of Marco Giugni’s three year cross-national comparative research project, financed by the European Commission, united with hand picked contributions from invited experts. Throughout his study he focuses on how the EU approaches national unemployment, the main national differences in talk about unemployment and unemployment policy, and how the representatives of the unemployed produce and coordinate demands in relation to unemployment policy. This book contains a number of genuinely cross-national chapters along with sections on specific national cases, namely the UK, Ireland, Germany, Switzerland, Belgium and Sweden.
Interwar Unemployment in International Perspective - Barry J. Eichengreen 2012-12-06 High unemployment has been one of the most disturbing features of the economy of the 1980s. For a precedent, one must look to the interwar period and in particular to the Great Depression of the 1930s. It follows that recent years have been marked by a resurgence of interest amongst academics in interwar unemployment. The debate has been contentious. There is nothing like the analysis of a period which recorded rates of unemployment approaching 25 per cent to highlight the differences between competing schools of thought on the operation of labour markets. Along with historians, economists whose objective is to better understand the causes, character and consequences of contemporary unemployment and sociologists seeking to understand contemporary society's perceptions and responses to joblessness have devoted increasing attention to this historical episode. Like many issues in economic history, this one can be approached in a variety of ways using different theoretical approaches, tools of analysis and levels of disaggregation. Much of the recent literature on the functioning of labour markets in the Depression has been macroeconomic in nature and has been limited to individual countries. Debates from the period itself have been revived and new questions stimulated by modern research have been opened. Many such studies have been narrowly focused and have failed to take into account the array of historical evidence collected and analysed by contemporaries or reconstructed and re-interpreted by historians.
The Nature Of Unemployment In Britain: Studies Of The Dhss Cohort

Unemployment and Employment Policies Concerning Women in Britain, 1900-1951-Keith Laybourn 2002 This study addresses the three major aspects of Britain's discriminatory approach to women's employment laws which were domestic service, broad unemployment and the links between voluntary bodies and the British state.

Unemployment-K. G. Knight 2018-12-14 First published in 1987. Unemployment is currently the major economic concern in developed economies. This book provides a comprehensive analysis of the economics of unemployment. It concentrates on theories of the labour market and examines the critical inter-relationships with the rest of the economy. It provides a thorough evaluation of theory and extensive consideration of the relevant empirical evidence. It emphasises the multi-causal nature of unemployment and concludes that policymakers should respond with a multi-faceted mix of policies.

Structural Unemployment in the UK-Peter Edward Hart 1988

The New International Year Book- 1932

Unemployment Insurance and Agricultural Labor in Great Britain-Wilbur Joseph Cohen 1940

The Urban Programme and the Young Unemployed-Gill Whitting 1986
Capitalism and Unemployment - Ram Jatan 1993

Helping the Unemployed - Richard Disney 1992 Both Germany and Great Britain have recently experienced increases in unemployment. Both countries have developed substantial labor market programs. Germany offers full-time adult training and retraining courses for employed and unemployed persons. Great Britain has a system of youth training but, until recently, has done little for adults. It has now, however, instituted a large program of part-time employment training for unemployed adults and subsidies to employers providing work experience. Germany has its own recruitment subsidy system that subsidizes 50-70 percent of the wages earned by persons recruited from the ranks of the hard-to-place unemployed. Germany has a job creation scheme for employing mostly long-term unemployed persons with a focus on social service employment, whereas Great Britain abolished its own large-scale job creation program in 1988 and now allocates resources directly to training. Both countries offer free job placement services. In Great Britain, the Restart Programme works to remotivate unemployed persons and pressure them to fill available vacancies. Both countries' employment programs have had degrees of success in reducing unemployment but could be improved by the following: an active system of placement and counseling, a system to recruit hard-to-place workers, and a system of publicly supported temporary work at regular workplaces. (13 figures; 62 tables; 169 references.) (MN)

Unemployment in Europe - Joan Muysken 1989-03-01 By an international forum of contributors, this is the result of a conference organized by the Department of Economics of the University of Limburg and the European Production Study Group. All aspects of labour market research were discussed relating them to the unemployment situation in Europe.
Seasonal Workers and Unemployment Insurance in Great Britain, Germany, and Austria-Franz Huber 1940

Partial Unemployment-Erika M. Szyszczak 1990 The recession of the 70's and 80's focussed the attention of a generation of politicians, policy-makers and academics, as well as popular culture, on the nature and significance of work shortages. This book examines the particular problem of how to regulate and compensate for partial unemployment resulting from short-time working and lay-offs, whether caused by economic recession, strikes, mechanical failure or natural disasters. It looks at the interaction of different forms of legal regulation of short-time working compensation. New forms of state regulation are examined and the effects of employment subsidy schemes on traditional industrial relations practice. The British experience is compared with that in Europe and the USA and the final chapter suggests new solutions utilizing work sharing and equal opportunities principles.

The New International Yearbook- 1932

The Sources and Nature of the Statistics of the United Kingdom-Maurice George Kendall 1952

The Jobs Gap in Britain's Cities-Ivan Turok 1999 This unique report examines the uneven pattern of economic and employment change across Britain in the last two decades, focusing on the 20 largest cities. It explores how the workforce has responded (eg through outmigration, outcommuting and reduced economic
participation), and looks at the impact on recorded unemployment. The authors argue that an understanding of these effects is vital to urban policy and area regeneration, as well as to a range of national economic and social policies that are currently insensitive to geographical disparities. The focus is at the city-wide scale to provide the overview and essential context within which local and neighbourhood level processes and policies need to be located. The report suggests that outmigration and outcommuting provide inadequate responses to urban economic problems, and that a more thoroughgoing policy of employment expansion is needed. The jobs gap in Britain's cities provides a clear and accessible analysis of employment trends and problems, and has important implications for many different strands of economic and social policy, including policies towards unemployment, welfare reform, urban regeneration and regional development. It is important reading, therefore, for policy makers at national and local government levels, researchers at various levels and teachers in universities and higher education.

Youth and the Condition of Britain - John Davis 1990

Canadiana - 1977

Eventually, you will unquestionably discover a
other experience and expertise by spending more
cash. yet when? do you take that you require to
get those every needs as soon as having
