Two Koreas in Development - Byoung-Lo Philo Kim 1991

The startling revolutions of recent years have had as great an impact on Northeast Asia as on Eastern Europe. Gorbachev's cautious withdrawal of support for North Korea and his establishment of ties with South Korea have created a need for a new research agenda exploring how communism and capitalism in Asia can be successfully restructured or redirected in a new world order. Focused on systemic issues, this book is the first study to attempt a comprehensive analysis of social and economic development in modern Korea as a whole. As a homogeneous nation artificially divided by the competing ideologies of the Cold War, Korea provides a unique laboratory for comparing divergent development processes undertaken by conflicting social systems. Current theories of Third World development have advocated either capitalist models of modernization or have called for the establishment of self-reliant socialist economies cut off from the world capitalist system. While capitalist South Korea has consistently outperformed Communist North Korea since the mid-1970s, development has not yet brought a fully evolved West-em-style democracy in its wake. "Self-reliant" North Korea achieved successful growth during its first fifteen years, but has since been faced with numerous structural limitations on sustained development, including severe restrictions on political freedom and civil liberties. In the author's view, the experience of the two Koreas suggests that the solution to underdevelopment must be based on the realization that exclusionary theories need modification in the light of special historical and sociological circumstances peculiar to individual nations. This volume offers a valuable interpretation of modern Korean history and constitutes an important contribution to the comparative study of capitalism and communism in practice. It will be of particular interest to specialists in international relations and comparative political systems.

Two Koreas in Development - Byoung-Lo Philo Kim 1992

The startling revolutions of recent years have had as great an impact on Northeast Asia as on Eastern Europe. Gorbachev's cautious withdrawal of support for North Korea and his establishment of ties with South Korea have created a need for a new research agenda exploring how communism and capitalism in Asia can be successfully restructured or redirected in a new world order. Focused on systemic issues, this book is the first study to attempt a comprehensive analysis of social and economic development in modern Korea as a whole. As a homogeneous nation artificially divided by the competing ideologies of the Cold War, Korea provides a unique laboratory for comparing divergent development processes undertaken by conflicting social systems. Current theories of Third World development have advocated either capitalist models of modernization or have called for the establishment of self-reliant socialist economies cut off from the world capitalist system. While capitalist South Korea has consistently outperformed Communist North Korea since the mid-1970s, development has not yet brought a fully evolved West-em-style democracy in its wake. "Self-reliant" North Korea achieved successful growth during its first fifteen years, but has since been faced with numerous structural limitations on sustained development, including severe restrictions on political freedom and civil liberties. In the author's view, the experience of the two Koreas suggests that the solution to underdevelopment must be based on the realization that exclusionary theories need modification in the light of special historical and sociological circumstances peculiar to individual nations. This volume offers a valuable interpretation of modern Korean history and constitutes an important contribution to the comparative study of capitalism and communism in practice. It will be of particular interest to specialists in international relations and comparative political systems.
**Crony Capitalism** - David C. Kang 2002-01-24 Even in Korea, corruption was far greater than the conventional wisdom allows - so rampant was corruption that we cannot dismiss it; rather, we need to explain it."--BOOK JACKET.

**China's Rise and the Two Koreas** - Scott Snyder 2009 With China now South Korea's largest trading partner and destination for foreign investment and tourism, what are the implications for politics and security in East Asia? In China's Rise and the Two Koreas, Scott Snyder explores the transformation of the Sino-South Korean relationship since the early 1990s, assessing the strategic significance of recent developments in China's relationship with both North and South Korea as well as the likely consequences of those developments for US and Japanese influence in the region. His meticulous study lends important context to critical debates regarding China's foreign policy, Northeast Asian security, and international relations more broadly.

**The Two Koreas** - Kyŏng-dong Kim 2003

**Policy and Economic Performance in Divided Korea During the Cold War Era** - Nick Eberstadt 2010 "The Korean peninsula during the Cold War provided a cruel but historically unparalleled real-world "experiment" in the relationship between polity and material advance: an ethnically and culturally homogenous nation was, in 1945, suddenly divided by an arbitrary boundary line and then subjected to two radically different and adversarial political economies for successive decades on end. Assessing the competition between the North and South Korean economies from partition to the end of the Soviet era, Nicholas Eberstadt argues that the storyline is not quite as simple as the now-prevailing narrative suggests (that centrally-planned economies are doomed to fail against market-oriented alternatives). Rather, he suggests, the race for material progress was just that: a race, the results of which were far from preordained at the outset. In Policy and Economic Performance in Divided Korea during the Cold War Era: 1945-91, Eberstadt presents an impressive compilation of hard-to-find comparative data on economic performance for the Democratic People's Republic of Korea (DPRK, or North Korea) and the Republic of Korea (ROK, or South Korea) over two critical generations. By a number of indicators, Eberstadt argues, Kim Il Sung's North Korea actually outperformed South Korea for much of this period -- not only in the years immediately following partition, but perhaps also into the 1970s. To explain these surprising results, Eberstadt details the impact of government policies on the course of growth of both economies and offers some unorthodox observations about material performance under these two contending polities. He finds that prevailing economic development theory on such issues as planned-versus-market economies, military burden, and the relationship between material advance and poverty, may require reexamination in light of the experience of the two Koreas between partition and the end of the Cold War." --Back cover.

**The Korean Journal of International Studies** - 1993

**Development of East European & Soviet Direct Trade Relations with South Korea** - Mark A. Kramar 1994
The North And South Korean Political Systems - Sung Chul Yang 1994-07-17 Unlike the situation in other countries, dichotomies between the two Koreas arise not from different cultural and ethnic backgrounds but from their diametrically opposed political and economic systems, offering an unmatched real-world case for comparative study. In this comprehensive volume, the author utilizes systematic and comparative perspectives to analyze North and South Korean political and economic institutions and processes and to examine their evolution since 1945. The book opens with a description of the political heritage that led to the emergence of the two separate regimes. The author considers the development of opposing totalitarian and democratizing political orders. He then surveys the differences between the economic systems, strategies, and policies of North and South Korea, evaluating their performance for the last five decades. The author also considers such long-standing problems as leadership succession, democratization, and liberalization; nuclear weapons and the continuing arms race; and contending approaches to education and reunification.

Post-Industrial Development in East Asia - Min-Hua Chiang 2018-07-09 This book purports to investigate and compare the economic development experiences in both Taiwan and South Korea in last two decades. Taiwan and South Korea’s economic development after WWII is a well-known story. However, their development after the successful post-war industrialization has not been comprehensively studied. The book examines whether the three factors—the role of private business, government policy, and foreign influence—that had contributed to Taiwan’s and Korea’s post-war development, are still relevant during the post-industrial development era. Researchers in the fields of global political economy, Asian economic development and East Asian studies will find this book a fresh and invaluable
contribution to the literature. The book will also be of value to policy makers in developing countries in drafting their national development policies, diplomats conducting economic diplomacy with Taiwan and South Korea, and business people planning to expand their business interests in Asia.

The Two Koreas - Bruce Cumings 1984 One in a series of booklets whose purpose is to stimulate greater and more effective understanding of world affairs among Americans, this seven-chapter report examines the political, economic, and anomalous positions of North and South Korea in the international system. "Traditional Legacies" traces the historical development of the two Koreas. "The Colonial Pressure Cooker" looks at the colonial system's impact on Korea. "Liberation, Separate Regimes, War" explores national division, rivalry, and the Korean War. "The South Korean Political System" examines South Korean political crises and growth. "The North Korean Political System" examines North Korea's socialist corporatism system. "The Two Economies" compares the two Koreas' different economies. "Foreign Relations" discusses the diplomacy of North and South Korea. The “Talking It Over” section offers questions for students and discussion groups. The report includes maps, pictures, and an annotated reading list. (TRS)

Comparative Economics in a Transforming World Economy - J. Barkley Rosser Jr. 2004 The second edition of an innovative undergraduate textbook in Comparative Economic Systems that goes beyond the traditional dichotomies. This second edition of an innovative undergraduate text offers an approach to understanding different economic systems that reflects both recent transformations in the world economy and recent changes in the field of Comparative Economic Systems. The traditional way of teaching comparative economics, with its reliance on relatively simple dichotomies (private vs. state, planning vs. market) does not take into consideration the many variants and mixtures of economic systems that exist in the real world. The Rossers' introduction in the first edition of the concept of the "new traditional economy"—the effort by a developing country to embed a modern economic system into a traditional culture, usually religious—presented a new way to look at developing economies. Their innovative examination of Iran and its effort to develop a "revolutionary Islamic economy" as an alternative to market capitalism illustrates the use of this new tool in comparative economics. After a four-chapter theoretical and historical overview, the book focuses on fifteen country studies, organized by economic system. The chapters on advanced market capitalism examine the economies of the United States (a chapter new to this edition) Japan, France, Sweden, and Germany. The chapters examining transition in former socialist economies discuss Russia, the former Soviet Republics, Poland, Hungary, Yugoslavia (including expanded treatment of the most successful transition economy, that of Slovenia), and China. The chapters in the final section of the book discuss "alternative paths" taken by the developing economies of Iran, India (its complex mix of socialism, capitalism, and tradition is examined in a chapter new to this edition), Mexico, and South and North Korea. The book concludes with a look at future trends that will continue to transform the world economy.

Colonisation - R. Mahalakshmi 2015-10-01 This volume examines and compares the colonial experiences in the two countries, India and Korea. It juxtaposes some of the common issues faced by the two completely different subject countries colonized by two completely different colonial powers. It presents the processes of trade, the socio-economic changes and the political transformations that were taking place in the two colonies. This book is the first of its kind and it opens up several topics for future comparative research. Some of the topics included are: aspects of social change and social transformation, colonialism and Indian development, modern Korean nationalism, China and Chinese in colonial Korea, anti-colonial movements and other aspects of colonialism in India and Korea.

Politics of Korean Reunification - Yong-hun Kang 1978

Two Koreas In Development: A Comparative Study Of Principles And Strategies Of Capitalist And Communist Third World Development
Historical Abstracts - Eric H. Boehm 1993

Asian Survey - 1992

Landside Risks - John Gulick 2001

Military Involvement in Politics and the Prospects for Democracy - KyoungKyo Seo 1993

Korean Journal of Comparative Law - 1990

Comparative Study on Migration, Urbanization, and Development in the ESCAP Region. Country Reports: Migration, urbanization and development in the Republic of Korea - 1980

Asia and Europe in Globalization - Göran Therborn 2006 This interdisciplinary book by a group of Asian and European scholars provides a deeper understanding of globalization as an historical process with special attention to the regional and national contexts. Globalization, this book demonstrates, has its roots in civilizational dialogues and interchanges.

Oxford Handbook of the International Relations of Asia - Saadia M. Pekkanen 2014 This handbook examines the theory and practice of international relations in Asia. Building on an investigation of how various theoretical approaches to international relations can elucidate Asia's empirical realities, authors examine the foreign relations and policies of major countries or sets of countries.

Comparative Research - 1981
The Quality of Life in Korea - Doh Chull Shin 2003-04-30 This is the first volume ever published to examine the objective and subjective qualities of Korean life from both comparative and dynamic perspectives. It presents non-Western policy alternatives to enhancing the quality of citizens’ lives, distinguishing Korea as an Asian model of economic prosperity and political democracy. It is intended for academics and policymakers interested in recent developments in Korea.

A Comparative Study on the Family Consciousness Between Korea and Japan - 1992

International Labour Documentation - International Labour Office. Central Library and Documentation Branch 1965

The Integration of Korea - Chung-Won Choue 1985

Doctoral Dissertations on Asia - 1993

Comparative Study of Fertility Control Experiences in Republic of Korea and Republic of China - 1987

Handbook of Economic Growth - Philippe Aghion 2005

Changing Comparative Advantage in Asia and the Pacific - 1996

China Perspectives - 2003

The Arabs and the Koreans - 1995

Papers in Comparative Studies - 1992

Getting the books *Two Koreas in Development: A Comparative Study of Principles and Strategies of Capitalist and Communist Third World Development* now is not type of inspiring means. You could not and no-one else going past books increase or library or borrowing from your contacts to contact them. This is an completely simple means to specifically get guide by on-line. This online publication *Two Koreas in Development: A Comparative Study of Principles and Strategies of Capitalist and Communist Third World Development* can be one of the options to accompany you following having additional time.

It will not waste your time. give a positive response me, the e-book will very aerate you new matter to read. Just invest tiny period to approach this on-line statement *Two Koreas in Development: A Comparative Study of Principles and Strategies of Capitalist and Communist Third World Development* as skillfully as evaluation them wherever you are now.
