The Peer Guide to Applied Sport Psychology for Consultants in Training-Mark W. Aoyagi 2016-11-10 Successful sport psychology professionals have benefitted from stimulating conversations, challenging questions, support, camaraderie, guidance, and advice offered by their graduate school classmates. Peer relationships are vital and valued aspects of professional development, with many of the relationships formed during school, serving as the closest confidences and strongest friendships throughout careers and lifetimes. Yet, the voices and experiences of fellow graduate students are sparsely reported in the sport psychology literature, and profoundly silent in textbooks. The Peer Guide to Applied Sport Psychology for Consultants in Training provides a platform for the influential voices of peers, with whom graduate students relate and connect on a visceral level.
Mimicking the environment of a thriving classroom, each chapter within the Peer Guide is primarily authored by graduate students, or in some cases recent graduates, with an academic mentor serving a secondary role. The chapter topics were selected by the editors—all of whom are experienced graduate instructors and have taught and mentored many young professionals—as areas where graduate students are commonly challenged, and correspondingly, where peer support and guidance are most valued. These topics include developing a theoretical orientation to performance excellence, utilizing science to guide practice, ethics, getting the most from supervision, initial experiences in consultation, working with both individuals and groups, and multicultural considerations. The chapters are written in a personal, relatable tone and provide science and practice, challenge and comfort, humor and vulnerability, and insights and anecdotes that are particularly meaningful and accessible coming from peers. A unique addition to the sport psychology literature, this volume is a key resource for developing and established consultants alike.

**No More Broken Eggs**-Tom Morin 2006 While lunching in Barcelona during the 1992 Olympic Games, swimming coach Tom Morin asked his Swedish counterparts how they had managed to beat the U.S. in a freestyle relay while drawing from a population of only 8 million. The Swedes explained a coaching theory that differed from the U.S. style of developing great athletes. With the U.S. population big enough to "throw thousands against the wall to see who survives and who becomes a broken egg," it is possible to develop champions by sheer numbers. When the population is small, a different coaching and training style must be applied. Thus was born what Morin saw as a call for No More Broken Eggs, the title of his important new book. The book's subtitle: A Guide to Optimizing the Sports Experience for Athletes, Coaches, Parents, and Clinicians, explains that this is an attempt to reach out to all of those whose mentoring can touch and shape young athletes and create a more positive experience for them as they grow in their sports. Matt Biondi, winner of 11 Olympic medals (including eight gold), wrote the foreword to the book. Biondi writes, "Coaches need to stop and pay attention to those who do not compete at a high level. They need to help their athletes both to develop life habits like persistence and time management and to learn teamwork and goal setting." Writes Morin: "Here in the United States we are often too focused on how good our kids are in sports by the time they are twelve. We use them, burn them out, and throw them away. We do not do much teaching, nurturing or instructing; we just try to weed out those who are not the best and we keep pushing and pushing those that are the best to be better. Many... end up being 'broken eggs.'" The book gives case study examples of athletes who succeeded or overcame the system and some who were weeded out. Chapters include tips for athletes and clinicians, and guidelines for parents and coaches. One chapter deals with an NFL defensive back sent to Morin for substance abuse counseling. This
player never succeeded in the NFL for reasons that the chapter clarifies and that will be relevant for many other gifted but challenged young athletes. No More Broken Eggs will serve as an important guidebook to all who touch the lives of young athletes, whether or not they are Olympic or NFL bound.

Sport Psych for Coaches - Cathy Martin 1994
Becoming a Sports Coach - James Wallis 2015-11-06 A ‘coach’ is more than just somebody who leads in the organisation and delivery of structured sport. The role of a coach goes beyond leadership, requiring an understanding of theories of teaching and learning. To become a coach you must know how people learn. Becoming a Sports Coach aims to introduce the multi-dimensional and inter-locking knowledge bases that any aspiring coach will need to develop, and that any established coach needs to master in order to improve their professional practice. While traditional coach education pathways have focused on what to coach, this book argues that understanding how knowledge can be communicated to learners is just as important. Asking why we coach, through critical reflection and self-knowledge, is also an essential part of the process of becoming a sports coach. The book explores three types of knowledge – content knowledge, pedagogic knowledge and self-knowledge – challenging the reader to reflect on their own coaching experiences and to develop a personal philosophy of coaching. It explores key pedagogic themes in contemporary coaching studies, such as humanistic coaching, inclusive practice, coaching for understanding, and the athlete-coach relationship. Real case studies are used to illuminate the ways – transferrable across sports - in which coaches can apply theory to practice and ultimately enhance their work. With contributions from leading coaching researchers and practitioners, combining practical guidance with important theoretical insights, this book will help any coaching student or developing professional to better understand the journey to becoming an effective sports coach.

The Coach's Toolbox - Peter S. Pierro 2002-10-01 As the coach, (for example in baseball) you teach your players how to bat, pitch, steal bases, back up throws from the outfield, bunt, make the double play pivot, etc. That is your job - what we want to do is to help you have your players play their very best. For example, Sandy, your second baseman, is giving your shortstop fits with her tosses on double play attempts. What do you do about it and how do you do it? We can show you the best ways to help her and ourself as she grows in the game. You will use proven mental processes to teach new skills and to improve on old skills (and create great attitudes while you're at it). Dr. Pierro presents twelve basic teaching/coaching strategies in a very positive manner so that you...
can teach your players the skills and tactics of the game more quickly, effectively, and joyfully. These strategies; including Visualization, Focusing, Anchoring, and Triggers; are presented with many examples and illustrations from real sports settings.
