Women's Health, Politics, and Power

This collection of essays addresses the broadening array of issues on the agenda of the women's health movements of the 1980s and 1990s, just as a previous collection, "Women and Health: The Politics of Sex in Medicine", gathered contributions from the earlier wave of the women's health movement in the 1970s. The papers in both volumes are selected from the "International Journal of Health Services", edited by Vicente Navarro. The essays in this volume were originally published in the 1980s and early 1990s. Together, they present a framework for understanding the struggles over women's health that have occurred in this time period, and provide specific analyses of women's health in relation to race/ethnicity and class, the work of health care, the health of women workers, international reproductive health, sexuality, AIDS, and public health policy.

Women's Health

How well do national agendas address all women's health care priorities? What are the implications for social action? Particular attention is paid in this collection of essays to how race, class, gender, and culture shape and in turn are shaped by treatment options and health care for certain subpopulations among Native American, Latina, Asian American, and African American women. Discussions of reproductive health, mental health, violence, and the treatment of stigmatized women raise perplexing issues about choice, chance, and social change.

The Politics of Women's Health

Examines the real world of women's health status and health-care delivery in different countries, and the assumptions behind the dominant medical model of solving problems without regard to social conditions. This book asks what feminist health-care ethics looks like if we start with women's experiences and concerns.

Women's Health

This book provides an integrated, multidisciplinary approach to women's health. Historical, sociocultural, psychological and biophysiological aspects of women's development are woven together to provide a complete women-centered perspective of health. While several excellent books in print provide information on diagnosis and treatment of women and address women's growth and development, Lewis and Bernstein strive to fill a void by marrying these perspectives. The book also offers a thorough investigation into the life cycle of women, and the roles of women as individuals and members of their communities and families.

Women, Sexuality and the Political Power of Pleasure: Susie Jolly 2013-06-13 This pioneering collection...
explores the ways in which positive, pleasure-focused approaches to sexuality can empower women. Gender and development has tended to engage with sexuality only in relation to violence and ill-health. Although this has been hugely important in challenging violence against women, over-emphasizing these negative aspects has dovetailed with conservative ideologies that associate women’s sexualities with danger and fear. On the other hand, the media, the pharmaceutical industry, and pornography more broadly celebrate the pleasures of sex in ways that can be just as oppressive, often implying that only certain types of people - young, heterosexual, able-bodied, HIV-negative - are eligible for sexual pleasure. Women, Sexuality and the Political Power of Pleasure brings together challenges to these strictures and exclusions from both the South and North of the globe, with examples of activism, advocacy and programming which use pleasure as an entry point. It shows how positive approaches to pleasure and sexuality can enhance equality and empowerment for all.

**Black Women in Politics**—Julia S. Jordan-Zachery 2018-09-01 Examines how Diasporic Black women engage in politics. This book explores how Diasporic Black women engage in politics, highlighting three dimensions—citizenship, power, and justice—that are foundational to intersectionality theory and politics as developed by Black women and other women of color. By extending beyond particular time periods, locations, and singular definitions of politics, Black Women in Politics sets itself apart in the field of women’s and gender studies in three ways: by focusing on contemporary Black politics not only in the United States, but also the African Diaspora; by showcasing politics along a broad trajectory, including social movements, formal politics, public policy, media studies, and epistemology; and by including a multidisciplinary range of scholars, with a strong concentration of work by political scientists, a group whose work is often excluded or limited in edited collections. The final result expands our repertoire of methodological tools and concepts for discussing and assessing Black women’s lives, the conditions under which they live, their labor, and the politics they enact to improve their circumstances. “Black Women in Politics offers a new perspective on Black women as political actors. Jordan-Zachery and Alexander-Floyd have assembled a stellar group of essays that speak to the broad experiences and concerns of Black women as political actors. Together, the essays present a compelling story of what we learn when we center Black women’s voices in policy debates, democratic theory, and notions of political leadership.” —Wendy Smooth, The Ohio State University

**U.S. History As Women’s History**—Linda K. Kerber 2000-11-09 This outstanding collection of fifteen original essays represents innovative work by some of the most influential scholars in the field of women’s history. Covering a broad sweep of history from colonial to contemporary times and ranging over the fields of legal, social, political, and cultural history, this book, according to its editors, ‘intrudes into regions of the American historical narrative from which women have been excluded or in which gender relations were not thought to play a part.’ State formation, power, and knowledge have not traditionally been understood as the subjects of women’s history, but they are the themes that permeate this book. Individually and together, the essays explore how gender serves to legitimize particular constructions of power and knowledge and to mold these into accepted practice and state policy. They show how the field of women’s history has moved from the discovery of women to an evaluation of social processes and institutions. The book is dedicated to pioneering women’s historian Gerda Lerner, whose work inspired so many of the contributors, and it includes a bibliography of her works. From the book The contributors to this volume grew up into a world in which history was rigidly limited. It paid little attention to social relationships, to issues of race, to the concerns of the poor, and virtually none to women. Women figured in it for their ritual status, as wives of presidents like Abigail Adams or Dolly Madison; for their role as spoilers, from the witches of Salem to Mary Todd Lincoln, or for their sacrificial caregiving, like Clara Barton or Dorothea Dix. Even when women like Sojourner Truth, Jane Addams, and Eleanor Roosevelt were named by historians, the radical substance of their work and their lives was routinely ignored. A very few historians of women--Eleanor Flexner, Julia Cherry Spruill, Caroline Ware--worked on the margins of the profession, their contributions unappreciated, and their writing vulnerable to the charge of irrelevance. Violence Against Women—Stanley G. French 1998 This is the first anthology to take a theoretical look at violence against women. Each essay shows how philosophy provides a powerful tool for examining a difficult and deep-rooted social problem. Stanley G. French, Wanda Teays, and Laura M. Purdy, all philosophers, present a familiar phenomenon in a new and striking fashion. The editors employ a two-tiered approach to this vital issue. Contributors consider both interpersonal violence, such as rape and battering; and also systemic violence, such as sexual harassment, pornography, prostitution, and violence in a medical context. The editors have further broadened the discussion to include such cross-cultural issues as rape in war, dowry deaths, female genital mutilation, and international policies on violence against women. Against this wide range of topics, which integrate personal perspectives with the philosophical, the contributors offer powerful analyses of the causes and effects of violence against women, as well as potential policies for effecting change.

Women with Disabilities - Michelle Fine 1989-10
Women with disabilities are women first, sharing the dreams and disappointments common to women in a male-dominated society. But because society persists in viewing disability as an emblem of passivity and incompetence, disabled women occupy a devalued status in the social hierarchy. This book represents the intersection of the feminist and disability rights perspectives; it analyzes the forces that push disabled women towards the margins of social life, and it considers the resources that enable these women to resist the stereotype. Drawing on law, social science, folklore, literature, psychoanalytic theory, and political activism, this book describes the experience of women with disabilities. The essays consider the impact of social class, race, the age at which disability occurs, and sexual orientation on the disabled woman's self esteem as well as on her life options. The contributors focus their inquiry on the self perceptions of disabled women and ask: From what sources do these women draw positive self images? How do they resist the culture's power to label them as deviant? The essays describe the ways in which disabled women face discrimination in the workplace and the failure of the mainstream women's movement to address their concerns. In the series Health, Society, and Policy, edited by Sheryl Ruzek and Irving Kenneth Zola.
