Library science applies the practices, perspectives, and tools of management, information technology, education, and other areas to libraries. It focuses on how to collect, organize, preserve, and share information resources.

What are the educational requirements for a career in library and resource management?
- A Master's degree in library science is generally needed for positions at public and academic libraries.
- Public school librarians may only be required to have an undergraduate degree.

What Concentrations Exist?
- Library and Information Science
- Data Element Dictionary
- XML Investigation
- Libraries and the Media
- Workflow Diagrams
- Electronic Resources Management System Data Structure

Careers and Courses
What kinds of courses may I take?
- Library Programming
- Cataloging and Classification
- School Media Center
- Research and Information Organizations
- Internet Information Resource Design

What is the work environment like?
- Librarians help people find information and use it for personal and professional purposes.
- They must have advanced knowledge of a different information and scholarly sources and follow trends in publishing and the media.
- Spend a considerable amount of time at a desk in front of a computer.
- Librarians may keep records for hospitals, media organizations, government agencies, and corporations.

What careers may I pursue?
- Librarian
- Researcher
- Bibliographer
- Preservationist
- Archivist

Encyclopedia of Operations Research and Management Science - Saul I. Gass 2012-12-06 Operations Research: 1934-1941," 35, 1, 143-152; "British The goal of the Encyclopedia of Operations Research and Operational Research in World War II," 35, 3, 453-470; Management Science is to provide to decision makers and "U. S. Operations Research in World War II," 35, 6, 910-925; problem solvers in business, industry, government and and the 1984 article by Harold Lardner that appeared in academia a comprehensive overview of the wide range of Operations Research: "The Origin of Operational Research," ideas, methodologies, and synergistic forces that combine to 32, 2, 465-475. form the preeminent decision-aiding fields of operations research and management science (OR/MS). To this end, we The Encyclopedia contains no entries that define the fields enlisted a distinguished international group of academics of operations research and management science. OR and MS and practitioners to contribute articles on subjects for are often equated to one another. If one defines them by the which they are renowned. methodologies they employ, the
equation would probably The editors, working with the Encyclopedia's Editorial stand inspection. If one defines them by their historical Advisory Board, surveyed and divided OR/MS into specific developments and the classes of problems they encompass, topics that collectively encompass the foundations, apply the equation becomes fuzzy. The formalism OR grew out of tions, and emerging elements of this ever-changing field. We the operational problems of the British and U. s. military also wanted to establish the close associations that OR/MS efforts in World War II.

**Library and Information Center Management, 8th Edition** - Robert D. Stueart 2012-11-27 This updated edition of the renowned library management textbook provides a comprehensive overview of the techniques needed to effectively manage a contemporary library or information center.

**Higher Education Management and Operational Research** - Gary Bell 2013-02-11 Higher Education in the UK operates in a rapidly changing and highly complex environment. Universities need to adapt quickly to this environment and managers must begin to explore ‘new angles’ and approaches in addressing the challenges they are now facing. This book offers a tool box of metaphors and associative Operational Research (OR) approaches. Metaphors are a powerful ‘way of seeing’ but also ‘a way of not seeing’. Furthermore, the OR discipline has significantly evolved over the last 30 years which has led to the emergence of three distinctive intellectual areas, namely Hard OR, Soft OR and Methodological Pluralism OR. Drawing on these intellectual areas and on the experience of educational and OR practitioners, the book highlights the use of various OR approaches to a variety of complex and uncertain problems encountered in higher education management. The book aims to explore ‘new perspectives’ in HE management thinking and to describe and illustrate the use of OR methodologies, methods and techniques in helping HE managers to make informed management decisions.
Scientific Management- 1917

Encyclopedia of Library and Information Science-Allen Kent 1973-10-01 "The Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful indexes. This thorough reference set--written by 1300 eminent, international experts--offers librarians, information/computer scientists, bibliographers, documentalists, systems analysts, and students, convenient access to the techniques and tools of both library and information science. Impeccably researched, cross referenced, alphabetized by subject, and generously illustrated, the Encyclopedia of Library and Information Science integrates the essential theoretical and practical information accumulating in this rapidly growing field."

Research Studies in Library Science-Bohdan S. Wynar 1971

The Library as an Organization-Mark Tyler Day 1969
The Alienated Librarian - Marcia J. Nauratil 1989

The Alienated Librarian is a thoughtful, thorough analysis of the proletarianization of professional work throughout history. . . . What this book does is to present a penetrating investigation of the problem, draw thoughtful conclusions and suggest coping strategies. Collection Management

This excellent book should attract a wide audience including professional librarians, library school faculty and students, library administrators, and the consulting community. It is highly recommended. Information Processing & Management

[Nauratil's] analysis does help us gain an understanding of the issue, just as her concluding chapter on coping, and beyond, may help us address the issue when we are confronted with it. Wilson Library Bulletin

Perhaps because of the popular stereotype of librarianship as a low-pressure, nonstressful profession, librarians have been largely overlooked in current research on occupational burnout. Yet, like other human service personnel who are in continual contact with the public, more and more librarians are experiencing burnout and consequent alienation in the workplace. This study is the first to provide a comprehensive analysis of the problem as it exists among today's librarians. Nauratil begins with an examination of the burnout phenomenon and the factors that contribute to stress and alienation in the human service professions. She discusses the additional pressures resulting from the dilemmas faced by libraries, including dwindling budgets, theft of library materials, understaffing, and the demand for broader or improved services. The costs associated with burnout--such as reduced productivity, rapid employee turnover, and deterioration of services--are also considered. The author asks whether alienation and burnout are the inevitable consequences of the librarian's job under contemporary conditions, and assesses the possible long-term effects of current developments both within library systems and in the communities and institutions they serve. Finally, she explores various strategies for coping with this type of occupational hazard and for strengthening the library system as a whole. This carefully researched and clearly written work will be a valuable resource for courses or research in librarianship, occupational sociology, personnel management, and related subjects.
The Principles of Scientific Management - Frederick Winslow Taylor 1913

Nigerian Libraries - 1974

The Assistant Librarian - 1967

Library and Information Center Management - Robert D. Stueart 1993 This internationally acclaimed text serves as the basic management text in programs of library & information studies throughout the world. It is also used as a ready-reference & for workshop discussions in all types of libraries & information centers. As with previous editions, the authors present the principles of library & information center management in a conceptual framework as it examines the dynamics of organizational missions, goals, policies & programs, & people, as well as in relation to external forces (e.g., users & funding authorities) that encourage change. This current edition features expanded sections on the change process, strategic planning & management, & managing conflict through Total Quality Management (TQM) in a technology intense environment. Charts, diagrams, & appendixes of library policies, procedures, organograms, & other forms are included.

Quantitative Measurement and Dynamic Library Service - Jing-Zhi Zhen 1980 "This is a unique book. It is the story of Australia as told and illustrated by the Aboriginal children of Australia. It is the element of surprise and joy in what the children see and feel that makes this book unique. Through the natural simplicity of their words and paintings, they convey their enjoyment and enthusiasm for the land which has been theirs for over 40,000 years... the story of Australia revealed in this book reflects the poetry and imagination of the children who tell it. It speaks in a language that will be understood by children and adults throughout the world" -- Book jacket.

Special Libraries - 1983 Also includes 1st-5th SLA triennial salary surveys.
Information Technology and Libraries- 1983

Financial Planning for Libraries-Ann E. Prentice 1983 Describes how to effectively prepare and implement budgets and discusses the relationships between budgeting and financial management activities.
