This is an in-depth account of the Chinese Imperial Maritime Customs Service, a uniquely cosmopolitan institution established in the wake of China’s defeat in the Opium Wars (1842–60), and a central feature of the Treaty Port System. The British-dominated service was headed by the famous Robert Hart who founded a far-reaching customs administration that also encompassed this as a key aspect of the British Empire. The Chinese Maritime Customs Service, 1854-1949 contains detailed historical narrative of the Service’s evolution, including its bureaucratic organization, fiscal responsibilities, and legal rights and powers. It is the first book-length study of the 11,000 foreign nationals who worked for the Service, offering an expansive overview of the Service’s bureaucratic organization, fiscal responsibilities, and legal rights and powers. It is the first book-length study of the 11,000 foreign nationals who worked for the Service, offering an expansive overview of the Service’s bureaucratic organization, fiscal responsibilities, and legal rights and powers. The book incorporates a non-Western focus alongside the transatlantic core of early 20th-century cosmopolitan ideas. The book examines the interactions between local and global networks of networks of networks of international indigenous peoples in resistance to a state-centric international system, and diaspora...
The China Order: Fei-Ling Wang 2017-08-07 Examines the rising power of China and Chinese foreign policy through a revisionist analysis of Chinese civilization. What does the rise of China mean, and how should the international community respond? With a holistic overview of Chinese longue durée history, Fei-Ling Wang provides a simple but powerful framework for understanding the nature of persistent and shifting Chinese power and its implications for the current global order. He argues that the Chinese model and tradition of political governance and world order—the China Order—is based on an imperial state of Confucian Legitimacy as historically epitomized by the Qing Han dynasty. Challenging a Narrative of decline in both power and influence, the China Order enhances Eastern European analysis for more than two millennia, until the late nineteenth century. Since 1949, the People’s Republic of China has been reconceived (on four premises) as the traditional China Order. Making use of its own historical struggles against the current world order and its own longue durée experience, Wang also offers new conceptual and assessments about the true golden era of Chinese civilization, explains the great East-West divergence between China and Europe, and analyzes the China Dream that drives much of current Chinese foreign policy. “An original, important, well-researched, and powerfully argued exploration of the virtues and vices of the Chinese state from its ancient past to its likely future.” — Edward Friedman, University of Wisconsin, Madison. “A masterpiece. Wang provides a grand, sweeping, even epic review of two thousand years of Chinese history. His argument is compelling and well documented, the richness and variety of sources—Chinese and English—he cites is breathtaking. The book is likely to end up on the reading list of every serious student of China’s position in the world for the next few years to come.” — Daniel C. Lynch, author of China’s Futures: PRC Elite Debates Economics, Politics, and Foreign Policy. “This imaginative and provocative grand tour of Chinese imperial order and geo-strategic past, present, and future, is destined to become a classic.” — Ming Xia, author of The People’s Congresses and Governance in China: Toward a New Mode of Governance.
