In Conflict No Longer-Irene Taviss Thomson 2000 Drawing on social-criticism, self-help manuals, and the social scientific analysis of American character, In Conflict No Longer examines American thinking about individualism, conformity, and community from 1920 through 1995. Taviss-Thomson's analysis reveals a basic shift in American culture: from a belief that the individual is necessarily in conflict with society and that the self chafes against the constraints imposed by society, to a belief that the self is expressed in the groups, relationships, and subcultures that help shape it. Taviss-Thomson contends that this new model of a relational or 'embedded' self arose due to a weakening of traditional identities based on occupation, social class, gender and age which left individuals freer to construct their own identities. In an age where Americans increasingly abandon the traditional mythology of an individual struggling against social constraints, In Conflict No Longer forecasts a picture of American culture for the next millennium.

Novelists in Conflict-Martin Hurcombe 2004 "This volume represents the first in-depth English-language study of the French combat novel of the Great War, an immensely popular genre at the time which includes influential texts such as Henri Barbusse's *Le Feu* and Roland Dorgeles's *Les Croix de bois*. It explores through these works, and less well-known but equally popular patriotic novels of the period, the effect that experiencing war has upon the writer's understanding of the world, arguing that, in their depiction of conflict, these writers demonstrate a decidedly complex and modernist understanding of humanity's place in the world. In particular, the author examines the French combat novel's evocation of a world where a sense of the Absurd vies with the novelist's desire to re-impose order through a particular political understanding of the Great War itself, be it in the form of revolutionary socialism, French nationalism, or humanism. In this way, this volume contends, ideology becomes a force for responding to and countering the sense of contingency that characterises the human experience of combat. It will be of interest to scholars of twentieth-century French fiction and thought."--BOOK JACKET.

Unstaging War, Confronting Conflict and Peace-Tony Fry 2019-07-24 This book presents the concept of 'unstaging' war as a strategic response to the failure of the discourse and institutions of peace. This failure is explained by exploring the changing character of conflict in current and emergent global circumstances, such as asymmetrical conflicts, insurgencies, and terrorism. Fry argues that this pluralisation of war has broken the binary relation between war and peace: conflict is no longer self-evident, and consequentially the changes in the conditions, nature, systems, philosophies and technologies of war must be addressed. Through a deep understanding of contemporary war, Fry explains why peace fails as both idea and process, before presenting 'Unstaging War' as a concept and nascent practice that acknowledges conflict as structurally present, and so is not able to be dealt with by attempts to create peace. Against a backdrop of increasingly tense relations between global power blocs, the beginnings of a new nuclear arms race, and the ever-increasing human and environmental impacts of climate change, a more viable alternative to war is urgently needed. Unstaging War is not claimed as a solution, but rather as an exploration of critical problems and an opening into the means of engaging with them.

Interpretations of Conflict-Richard B. Miller 1991-11-15 With today's world torn by violence and conflict, Richard B. Miller's study of the ethics of war could not be more timely. Miller brings together the opposed traditions of pacifism and just-war theory and puts them into a much-needed dialogue on the ethics of war. Beginning with the duty of nonviolence as a point of convergence between the two rival traditions, Miller provides an opportunity for pacifists and just-war theorists to refine their views in a dialectical exchange over a set of ethical and social questions. From the interface of these two long-standing and seemingly incompatible traditions emerges a surprisingly fruitful discussion over a common set of values, problems, and interests: the presumption against harm, the relation of justice and order, the ethics of civil disobedience, the problem of self-righteousness in moral discourse about war, the ethics of nuclear deterrence, and the need for practical reasoning about the morality of war. Miller pays critical attention to thinkers such as Augustine and Thomas Aquinas, as well as to modern thinkers like H. Richard Niebuhr, Paul Ramsey, Martin Luther King, Jr., James Douglass, the Berrigans, William O'Brien, Michael Walzer, and James Childress. He demonstrates how pacifism and just-war tenets can be joined around both theoretical and practical issues. Interpretations of Conflict is a work of massive scholarship and careful reasoning that should interest philosophers, theologians, and religious ethicists alike. It enhances our moral literacy about injury, suffering, and killing, and offers a compelling dialectical approach to ethics in a pluralistic society. Richard B. Miller is assistant professor of religious studies at Indiana University.

Introduction to Psychotherapy-J. A. Hadfield 2015-08-11 First published in 1967, the original blurb reads: This book is intended to give the intelligent lay reader a comprehensive view of the subject of psychotherapy, the treatment of nervous disorders by mental means. These disorders are of increasing importance on account of their wide-spread nature and of the misery they produce. It describes the development of psychotherapy as employed by the most primitive peoples and races, through animal magnetism and hypnotism to the more modern analytical schools of Freud, Jung and Adler. It sets out in particular to give the positive contributions of these various systems, although this does not preclude criticism of their weaknesses and more dubious theories. Dr Hadfield has had the widest experience, having treated psychoneurotic disorders for over fifty years, including the war neuroses in the two world wars, both in the Navy and in the Army; and, as Lecturer in the University of London in the subject for over forty years, he has had the opportunity to systematize the knowledge thus obtained. As a result of this experience he has come to conclusions as to the nature, causes and treatment of such disorders differing somewhat from those of the established Schools, and it is these findings which are given in the latter part of the book under the title, 'Direct Reductive Analysis'. The book will be useful to all those - teachers and parsons as well as medicals - who have to deal with human beings and their aberrations, and to them it is addressed.

Individual and Conflict in Greek Ethics-Nicholas White 2002-06-13 Nicholas White opposes the long-standard view that ancient Greek ethics is fundamentally different from modern ethical views, especially those prevalent since Kant. Since the eighteenth century, and indeed since before Hegel, moral philosophers wishing to oppose the dualism of rationality-cum-morality vs. inclination, especially as it is manifested in Kant, have looked to Greek thought for an alternative conception of ethical norms and the good life. As a result, Greek ethics, particularly in the so-called Classical period of the fourth century BCE, has for more than two centuries been standardly thought to be fundamentally eudaimonist, and to have the character of what is nowadays normally called the ethics of virtue. White argues that although this picture of Greek ethics is not without an element of truth, it nevertheless seriously distorts the facts. In the first place, Greek thought is far more variegated than the picture suggests. Secondly, it contains many elements — even in the Classical thinkers Plato and Aristotle — that are not eudaimonist and also not suitable for an ethics of virtue. Greek thinkers were not as a group convinced of the possibility of a harmony of one's happiness with full regard for the happiness of others and with conformity to ethical norms. On the contrary, Greek thinkers were well aware of, and took seriously, the idea that ethical norms can possess a force that does not derive from conduciveness to one's own happiness. Indeed, even Plato and Aristotle took it that under certain circumstances there can even be a clash between ethical standards and one's own well-being. The project of completely eliminating the possibility of

such a clash came to full development not in the Classical period but rather in the ethics of the Stoics in the third century. Individual and Conflict in Greek Ethics argues that throughout Greek thought the concept of ethics as a source of obligations and imperatives can, in unfavorable circumstances, run counter to one's own happiness. In this sense Greek ethics has a shape similar to that of modern Kantian and post-Kantian thinking, and should not be seen as opposed to it.

The Law of Armed Conflict-Geoffrey S. Corn 2018-09-14 The Law of Armed Conflict provides a complete operational scenario and introduction to the operational organization of United States forces. The focus remains on United States law perspective, balanced with exposure to areas where the interpretation of its allied forces diverge. Jus ad bellum and jus in bello issues are addressed at length. The casebook comes to students with stunning authority. All of the authors are active or retired United States Army officers with more than 140 years of collective military operational experience among them. Several have experience in both legal and operational assignments as well. They deliver a comprehensive coverage of all aspects of the law of armed conflict, explaining the difference between law and policy in regulation of military operations.

From Conflict to Recognition- 2012-01-01 This volume will be of interest to scholars examining the relationship between culture and identity, concepts of individual and group agency in multicultural settings, and the effect that our globalising world has on regional cultural systems and local communities. From Conflict to Recognition: Moving Multiculturalism Forward grew out of research presented at the 3rd Global Conference of Multiculturalism, Conflict and Belonging held by Inter-Disciplinary.net at Mansfield College, Oxford University in September 2009. The conference provided a platform for researchers from diverse regions of the world and a variety of fields to present their work and engage each other on the major cultural transformations and epistemological shifts occurring in the current global paradigm. A unique aspect of the volume is its dialogic structure: each author refers to the work of other authors in the book; thus forming threads through-out the work, which link what are often perceived as unrelated issues. The volume is comprised of thirteen chapters divided into four thematic sections: Rights, Culture and Recognition; Complex Stories of Identity Formation; The Interweaving of Self and Other - Being and Belonging; and Crossing Boundaries and the Language of the Aesthetic.

International Law and Armed Conflict: Exploring the Faultlines-Michael Schmitt 2007-08-13 International law and armed conflict exist in a symbiotic relationship. In some cases, law shapes conflict proactively by imposing normative limits in advance of the appearance of proscribed conduct. Much more commonly, armed conflict either reveals lacunae in the law or demonstrates how law designed for yesterday's wars falls short when applied to contemporary conflict. When that happens, international law reacts by allowing provisions to fall into desuetude, embracing new interpretations of existing prescriptions, or generating new norms through practice or codification. In the 21st Century, both international security and armed conflict are the subject of arguably unprecedented sea changes. As a result, claims that both the jus ad bellum and jus in bello are unwieldy and ill-fitting in the context of modern hostilities have surfaced prominently. Whether one agrees with such dire assessments, what has become clear is that armed conflict is increasingly exposing faultlines in the law governing the resort to force. The intent of this collection of essays in honour of Professor Yoram Dinstein on the occasion of his 70th birthday is to explore such faultlines, first by identifying them and then by assessing their consequences. In a sense, then, the essays, contributed by the top minds in the field, will serve to assist academics and practitioners to anticipate pressure on the law governing armed conflict and, to the extent possible, react accordingly. Paralleling Professor Dinstein's classic works - War, Aggression, and Self-Defence and The Conduct of Hostilities Under the Law of International Armed Conflict ? the book addresses both ius ad bellum and ius in bello topics.

Weariness of the Self-Alain Ehrenberg 2009-12-20 Depression, once a subfield of neurosis, has become the most diagnosed mental disorder in the world. Why and how has depression become such a topical illness and what does it tell us about changing ideas of the individual and society? Alain Ehrenberg investigates the history of depression and depressive symptoms across twentieth-century psychiatry, showing that identifying depression is far more difficult than a simple diagnostic distinction between normal and pathological sadness - the one constant in the history of depression is its changing definition. Drawing on the accumulated knowledge of a lifetime devoted to the study of the individual in modern democratic society, Ehrenberg shows that the phenomenon of modern depression is not a construction of the pharmaceutical industry but a pathology arising from inadequacy in a social context where success is attributed to, and expected of, the autonomous individual. In so doing, he provides both a novel and convincing description of the illness that clarifies the intertwining relationship between its diagnostic history and changes in social norms and values. The first book to offer both a global sociological view of contemporary depression and a detailed description of psychiatric reasoning and its transformation - from the invention of electroshock therapy to mass consumption of Prozac - The Weariness of the Self offers a compelling exploration of depression as social fact.

War and Conflict in Africa-Paul D. Williams 2016-06-23 After the Cold War, Africa earned the dubious distinction of being the world's most bloody continent. But how can we explain this proliferation of armed conflicts? What caused them and what were their main characteristics? And what did the world's governments do to stop them? In this fully revised and updated second edition of his popular text, Paul Williams offers an in-depth and wide-ranging assessment of more than six hundred armed conflicts which took place in Africa from 1990 to the present day - from the continental catastrophe in the Great Lakes region to the sprawling conflicts across the Sahel and the web of wars in the Horn of Africa. Taking a broad comparative approach to examine the political contexts in which these wars occurred, he explores the major patterns of organized violence, the key ingredients that provoked them and the major international responses undertaken to deliver lasting peace. Part I, Contexts provides an overview of the most important attempts to measure the number, scale and location of Africa's armed conflicts and provides a conceptual and political sketch of the terrain of struggle upon which these wars were waged. Part II, Ingredients analyses the role of five widely debated features of Africa's wars: the dynamics of neopatrimonial systems of governance; the construction and manipulation of ethnic identities; questions of sovereignty and self-determination; as well as the impact of natural resources and religion. Part III, Responses, discusses four major international reactions to Africa's wars: attempts to build a new institutional architecture to help promote peace and security on the continent; this architecture's two main policy instruments, peacemaking initiatives and peace operations; and efforts to develop the continent. War and Conflict in Africa will be essential reading for all students of international peace and security studies as well as Africa's international relations.

The Art of Freedom-Juliane Rebentisch 2018-03-15 The concept of democratic freedom refers to more than the kind of freedom embodied by political institutions and procedures. Democratic freedom can only be properly understood if it is grasped as the expression of a culture of freedom that encompasses an entire form of life. Juliane Rebentisch's systematic and historical approach demonstrates that we can learn a great deal about the democratic culture of freedom from its philosophical critics. From Plato to Carl Schmitt, the critique of democratic culture has always been articulated as a critique of its "aestheticization". Rebentisch defends various phenomena of aestheticization from the irony typical of democratic citizens to the theatricality of the political as constitutive elements of democratic culture and the notion of freedom at the heart of its ethical and political self-conception. This work will be of particular interest to students of Political Theory, Philosophy and Aesthetics.

Transforming Conflict through Communication in Personal, Family, and Working Relationships-Peter M. Kellett 2016-11-15 A transformational approach to conflict argues that conflicts must be viewed as embedded within broader relational patterns and social and discursive structures. Central to this book is the idea that the origins of transformation can be momentary, situational, and small-scale or large-scale and systemic. The momentary involves shifts and meaningful changes in communication and related patterns that are created in communication between people. Momentary transformative changes can radiate out into more systemic levels, and systemic transformative changes can radiate inward to more personal levels. This book engages this transformative framework by bringing together current scholarship that epitomizes and highlights the

contribution of communication scholarship and communication-centered approaches to conflict transformation in personal, family, and working relationships and organizational contexts. The resulting volume presents an engaging mix of scholarly chapters, think pieces, and personal experiences from the field of practice and everyday life. The book embraces a wide variety of theoretical and methodological approaches, including narrative, critical, intersectional, rhetorical, and quantitative. It makes a valuable additive contribution to the ongoing dialogue across and between disciplines on how to transform conflicts creatively, sustainably, and ethically.

The Treatment of Combatants and Insurgents Under the Law of Armed Conflict-Emily Crawford 2010-01-14 On the recent US treatment of detainees in Guantanamo Bay in the "War on Terror", this book draws on considerable legal precedent, legal theory, and policy arguments to make the case that it is time for the law relating to the regulation of armed conflicts to be more uniformly applied. Readership: Scholars of international humanitarian law, international human rights law, and international criminal law; post-graduate students; practitioners in these areas.

New Directions in Conflict Theory-Raimo Väyrynen 1991-08-23 This is a timely work which explores the validity of rational and subjective approaches to conflict resolution, considers the value of international law and organizations for addressing complex social phenomena, and outlines a structural approach to international conflicts. In addition it extends the analysis of conflict transformation to new issues on the international agenda, such as antagonism between urban and rural areas and threat to the environment.

Understanding Ethnic Conflict-Raymond Taras 2015-08-07 Understanding Ethnic Conflict provides all the key concepts needed to understand conflict among ethnic groups. Illustrating this model in five original case studies, the unique combination of theory and application in Understanding Ethnic Conflict facilitates more critical analysis of contemporary ethnic conflicts and the world's response to them.

Managing Interpersonal Conflict-William A. Donohue 1992-07-01 This book explores the process of interpersonal conflict - from the initial decision as to whether or not to confront differences through to how to plan the actual confrontation. It deals extensively with negotiation and, where negotiation proves unsuccessful, with third-party dispute resolution. To avoid destructive or violent behaviour, Donohue emphasizes the importance of keeping conflicts under control and of focusing on the pertinent issues. He argues that the key to managing conflict is to address differences collaboratively so that the parties can create better solutions and, ultimately, strengthen their relationships.

Weapons and the Law of Armed Conflict-William H. Boothby 2016-03-10 Bringing together the law of armed conflict governing the use of weapons into a single volume, the fully updated Second Edition of Weapons and the Law of Armed Conflict interprets these rules and discusses the factors influencing future developments in weapons law. After relating the historical evolution of weapons law, the book discusses the important customary principles that are the foundation of the subject, and provides a condensed account of the law that exists on the use of weapons. The treaties and customary rules applying to particular categories of weapon are thereafter listed and explained article by article and rule by rule in a series of chapters. Having stated the law as it is, the book then explores the way in which this dynamic field of international law develops in the light of various influences. The legal review of weapons is discussed, both from the perspective of how such reviews should be undertaken and how such a system should be established. Having stated the law as it is, the book then investigates the way in which this dynamic field of international law develops in the light of various influences. In the final chapter, the prospects for future rule change are considered. This Second Edition includes a discussion of new treaty law on expanding bullets, the arms trade, and norms in relation to biological and chemical weapons. It also analyses the International Manuals on air and missile warfare law and on cyber warfare law, the challenges posed by 'lethal autonomous weapon systems', and developments in the field of information and telecommunications otherwise known as cyber activities.

International Multiparty Mediation and Conflict Management-Sinisa Vukovic 2015-10-05 This volume aims to provide a detailed explanation of the effects of cooperation and coordination on international multiparty mediation in conflicts. Contemporary scholarship stresses that the crucial ingredients for a successful multiparty mediation are 'consistency in interests' and 'cooperation and coordination' between mediators. This book seeks to supplement that understanding by investigating how much the 'consistency of interests' and 'cooperation and coordination' affect the overall process, and what happens to the mediation process when mediating parties do not share the same idea and interest in finding a common solution. At the same time, it explores the obstacles in achieving coordination and coherence between various mediators in such an environment and how to surmount the problems that multiple mediators face when operating without a 'common script' in attempting to mediate a negotiated settlement. The study investigates three distinct mechanisms (both on the systemic and contextual level) that have the potential to deter defection from a (potential) member of the multiparty mediation coalition: geo-political shifts, changes in the conflict dynamics, and mediators' ability to bargain for a cooperative relationship. As the number of states and international actors that are involved in mediation increases, a careful assessment is necessary not only of their relative institutional strengths and weaknesses, but also of how to promote complementary efforts and how to synchronize the whole process when one actor is transferring the responsibilities for mediation to others. This book will be of much interest to students of mediation, conflict management, war and conflict studies, security studies and IR.
