The First Book of Moses, Called Genesis- 1999 The publication of the King James version of the Bible, translated between 1603 and 1611, coincided with an extraordinary flowering of English literature and is universally acknowledged as the greatest influence on English-language literature in history. Now, world-class literary writers introduce the book of the King James Bible in a series of beautifully designed, small-format volumes. The introducers' passionate, provocative, and personal engagements with the spirituality and the language of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.

In the Beginning-Rita R. Ward 1967

In the Beginning-Carolyn North 2010-03 IN THE BEGINNING: CREATION MYTHS FROM AROUND THE WORLD is a beautifully illustrated and informative collection of creation stories from 15 cultures, using indigenous sources. These stories demonstrate that creation is ongoing, everywhere and always, and that all of us are creators all of the time. This engaging book of images and stories is ultimately about creativity in all its forms. Originally an exhibition, IN THE BEGINNING has appeared in museums, galleries, churches, and schools in several U.S. cities. An audio version of the book, in which the myths are read by Amy Walker, is available from Findhorn Press.

In the Beginning "Pope Benedict XVI 1995-11-02 While the stories of the vcreation of the world and of the fall of humankind have often given rise to conflict - fundamentalists twist the Bible into science and history while rationalists approach this issue by "divorcing God from creation" - Cardinal Ratzinger presents the Catholic middle ground between extremist positions in explaining the vitality of these early Old Testament writings. After the Beginning-Anthony L. Edridge 2012-06-27 A new and inspiring view of creation and the Flood After the Beginning offers compelling insight about God's purpose for an eternal loving relationship with mankind that was made in His image. This theme is revealed in Genesis with the creation of Adam and Eve, with the animals named by Adam, and with the animals that were saved on the ark. From creation through the Flood, Dr. Edridge concludes that the creatures described in Genesis had emotional capability, such as mammals and birds. Further consideration of species that should be included in the creation narrative leads to agreement between the biblical sequence of creation and the scientific chronology of the fossil record and the early stages of the Earth's development. Dr. Edridge examines different flood models to determine if they are consistent with biblical parameters and scientific scrutiny. Based on documented flood records and geological events, he proposes a new catastrophic Flood Model that meets both qualitative and quantitative requirements for the most likely flooded area, the cradle of civilization. This model is unique, providing a viable mechanism that caused the Flood to subside, but which agrees with the biblical description.

In the Beginning, GOD-Marva J. Dawn 2009-07-08 The author provides theological reflections and personal anecdotes to describe the cultural shift of Christian focus from God to humanity in general and explains a stronger trust in the Genesis creation stories will increase trust in God and improve humanity.

To Begin With, God Created--Karl Löning 2000 "This book is an attempt to bring the parts of the divided yet unified Christian Bible into dialogue with one another in respect to the theology of Creation so that the total biblical tradition can once again come alive. Creation is the Alpha and Omega of a theology that takes seriously the Jewish dimension of Christianity. The special appeal of this project, which is indebted to the Christian-Jewish dialogue, is that here an Old Testament scholar and a New Testament scholar together produce a book in which their differing perspectives are in constant encounter."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The Battle for the Beginning-John F. MacArthur 2005-03-20 The battle lines have been drawn. Is the enemy winning? "Thanks to the theory of evolution," writes best-selling author John MacArthur, "naturalism is now the dominant religion of modern society. Less than a century and a half ago, Charles Darwin popularized the credo for this secular religion. Naturalism has now replaced Christianity as the main religion of the Western world, and evolution has become its principal dogma." Many Christians who claim to believe that the Bible is God's revealed truth seem willing to allow modern scientific theories to replace the Genesis account of creation. Such compromises present a conspicuous danger. Bible teacher and pastor, John MacArthur, believes that in Genesis 1-3 we find the foundation of every doctrine that is essential to the Christian faith?the vital underpinnings for everything we believe.

The Battle for the Beginning draws a clear line on today's theological landscape. "Everything in Scripture that teaches about sin and redemption assumes the literal truth of the first three chapters of Genesis. If we wobble to any degree on the truth of this passage," John MacArthur insists, "we undermin the very foundations of our faith."

"In the Beginning ..."-John R. Rice 2000-08

In the Beginning-Virginia Hamilton 1988 An illustrated collection of twenty-five myths from various parts of the world explaining the creation of the world.

In the Beginning-B. W. Ball 2012

Stories of the Beginning-E. J. van Wolde 1996

Creation and Dology-Gerald L. Hiestand 2018-10-23 What does it mean to both affirm the goodness of God's creation and anticipate the new creation? Bringing together contributions from church leaders, academic theologians, and scientists on the doctrine of creation, this volume engages with Scripture, scientific theory, church history, and current issues to help Christians understand the beginning and ending of God's good creation. The Book of Beginnings-Ben Clausen 2006 Genesis...the story of beginnings...sets the stage for everything we know about God, the natural universe, humanity, and good and evil. It lays the foundation for all the questions asked by philosophy about knowledge, meaning, free will, the soul, ethics, happiness, and success. It forms the basis for all biblical teachings.A scientist and a scholar team up to look at the scientific and theological issues addressed in the book of Genesis. A must-have for all Sabbath school teachers or for anyone wanting to understand the science, history, and theology packed into Genesis.

Creation and Time-Hugh Norman Ross 1994 Calls for a cease-fire between Christians believing in an "old" Earth that evolved over millions of years and those who believe in a "new" Earth created over six twenty-four hour days 10,000 years ago

Creation and the Second Coming-Henry M. Morris 1991-01-01 Possibly the only book of its kind, Creation and the Second Coming captivates the reader by linking our origins with our destiny. Blending biblical stories like Noah andJesus teaching His disciples, Dr. Henry Morris weaves an intriguing resource for prophecy and creationism buffs.

Biblical Creationism-Henry Morris 2000-04-01 Examines the doctrine of creation throughout the Bible, not only in Genesis but other books such as Colossians and Ezra.

Rocks and Plants-Zondervan, 2010-10-05 " Let the water under the sky be gathered into one place. Let dry ground appear." And That's exactly what happened. God called the dry ground "land." -Genesis 1:9 (NlrV) In Rocks & Plants, kids explore the physical world, examining the often overlooked details of planet Earth, and leaning about some of the wonders that lie hidden just above and beneath its surface. Exploding volcanoes that birth small islands, plants that save lives, floods that carve out cliffs and caves, the recycling of our atmosphere-and much, much more-are investigated in kid-friendly language and concepts. Add drawings, photos, and fun facts, and young scientists see that the awesome power and splendor of God is echoed in Earth's fossils, stones, and mountains.

In the Beginning-Joan O'Brien 1982 Addressed to students of classical mythology, religion, and comparative mythology, this volume contains myths of creation from three ancient cultures. Included are selections from the Hebrew Bible, the Mesopotamian Enuma Elish and Atrahasis, and Hesiod's Theogony and Works and Days. The texts are complemented by essays on the cultural contexts in which the myths arose.

Holy Bible, New International Version- 1999

In the Beginning, God-Joel D. Heck 2011 Dr. Heck presents a theological defense of young earth creationism through a straightforward reading of the first chapter of Genesis as narrative history. This book works well for topic study on creation and for Old Testament studies on the text of Genesis. Much has been written on the creation from the scientific view, but little has attempted to explain the text of Genesis 1. A failure to read Genesis 1 as narrative history almost always comes as a result of the reader bringing presuppositions on the assured results of science. The first chapter of Genesis must be taken as historical fact!

Three Views on Creation and Evolution-Zondervan, 2010-06-01 For Christians, the issues raised by the different views on creation and evolution are challenging. Can a "young earth" be reconciled with a universe that appears to be billions of years old? Does scientific evidence point to a God who designed the universe and life in all its complexity? Three Views on Creation and Evolution deals with these and similar concerns as it looks at three dominant schools of Christian thought. Proponents of young earth creationism, old earth creationism, and theistic evolution each present their different views, tell why the controversy is important, and describe the interplay between their understandings of science and theology. Each view is critiqued by various scholars, and the entire discussion is summarized by Phillip E. Johnson and Richard H. Bube. The Counterpoints series provides a forum for comparison and critique of different views on issues important to Christians. Counterpoints books address two categories: Church Life and Bible and Theology. Complete your library with other books in the Counterpoints series.

Creation Vs. Evolution-Ralph O. Muncaster 2000 Darwin shocked the world with his evolution theory and belief that fossils would provide the proof. This Examine the Evidence book presents evolution scholarship, then reveals the scientific discoveries that now point to creation!

Creation and the Big Bang-Clare Raynard Magoon Jr. 2018-10-23 Although the so-called big bang theory has been proven and is accepted by over 99 percent of scientists, many of us no doubt still wonder about the beginning of the universe and how something came from nothing. We may know how it began, but what caused the big bang? And more importantly, how do we fit into the broader picture? In Creation and the Big Bang, author Clare Raynard Magoon Jr. explores the big bang and helps explain the answers to some of these big questions about our origin and our purpose. The big bang, he argues, proves the creation of matter from nothing, which in fact confirms the opening verse of the Bible, Genesis 1:1, which states, "In the beginning God created the heavens and the earth." It also looks at new scientific discoveries and the founding scientists who studied our origins, showing how greats like Sir Francis Bacon, Isaac Newton, Max Planck, and Albert Einstein were all believers and sought after a creator behind the majesty of the cosmos. It is reassuring to know that there is a creator of the universe. It is even more satisfying to know that the creator, God, is a personable being who cares about us and watches over us, keeping the conditions in the universe, and particularly our planet Earth, fine-tuned at all times to accommodate our existence. With both facts and faith, we can enjoy this knowledge and this reassurance as we reflect on the fingerprints of God in his creation.

What Should We Believe? Creation Or Evolution-Thomas Eristhee 2008-12-01 This book is to strengthen believers in their faith. It teaches what the bible says about creation in a simple form, and exposes the folly of evolution. It comes in the right time as there seems to be a revival on the teachings of evolution; and some in the church are being deceived by this satanic doctrine. Dr. Eristhee shows clearly how evolution is impossible and only creation has a solid foundation. You will be more equipped by reading this book. "In the beginning God created the heaven and the earth" Genesis 1:1. If you do not believe the first verse of the Bible you will not believe the rest.

Science, Creation and the Bible-Richard F. Carlson 2010-10-04 Physicist Richard Carlson and biblical scholar Tremper Longman address the long-standing problem of how to relate scientific description of the beginnings of the universe with the biblical creation passages found in Genesis. Experts in their respective fields, these two authors provide a way to resolve seeming conflicting descriptions.

Creation or Evolution-Denis Alexander 2014-09-19 Dr Denis Alexander is a neuroscientist who believes passionately in both the biblical doctrine of creation and the coherence of evolutionary theory. His book draws on the latest genetic research. What do we mean by creation and evolution? What are the common scientific objections to evolution? Is evolution atheistic? Who were Adam and Eve? Can the concept of the Fall be reconciled with evolutionary theory? How could a God of love create a world where animals kill each other? What about intelligent design? The author concludes that the question in the title is a false dichotomy: we do not need to choose, since both are true. 'Nature is what God does' - Augustine This new edition takes account of the most recent scientific and theological developments and responds to critiques of the first edition.

In the Beginning... We Misunderstood-Johnny V. Miller 2012 For years, the evangelical church and its members have debated whether the Bible should be interpreted literally or symbolically in regards to the age of the earth. In their groundbreaking new book, In the Beginning . . . We Misunderstood, authors Johnny V. Miller and John M. Soden say that all these arguments have missed the point. Rather, what Christians really need to know is how to interpret the Bible in its original context. Exposing the fallacies of trying to make the biblical text fit a specific scientific presupposition, Miller and Soden offer a new approach to interpreting Genesis 1 that explores the creation account based on how the original audience would have understood its teaching. First, the authors present a clear explanation of the past and present issues in interpreting the first chapter of the Bible. Second, Miller and Soden break down the creation account according to its historical and cultural context by comparing and distinguishing both the Egyptian and Mesopotamian settings. Finally, they explore common objections to help readers understand the significance that the creation account has for theology today. Christians need not look any further than Genesis 1 to find clues to its meaning. Both irenic and bathed in Scripture, In the Beginning . . . We Misunderstood will equip every believer to navigate the creation wars, armed with biblically sound explanations.

ROMW versus RAMB-Simeon Johnson 2019-11-20 The declaration of Creation begins in Genesis with "In the beginning" and end with "I am Alpha and Omega, the beginning and the end, the first and the last." In the Beginning-Bernard F. Batto 2013-05-22 Bernard F. Batto spent the bulk of his career examining the ancient Near Eastern context of the Hebrew Bible, with particular interest in the influence of the surrounding cultures on the biblical creation stories. This collection gathers six of his most important previously published essays and adds two new contributions. Among the essays, Batto identifies various creation motifs prevalent in the ancient Near East and investigates the reflexes of these motifs in Genesis 1–11 and other biblical accounts of the primeval period. He demonstrates how the biblical writers adapted and responded to the creation ideas of Mesopotamia, Egypt, Ugarit, and elsewhere. The articles in the volume were written as independent essays. Nevertheless, they are united by theme. Throughout, Batto makes clear his understanding of the Hebrew Bible as a patently unique text, yet one that cannot possibly be understood independent of greater cultural sphere in which it developed. In the Beginning will serve as an indispensable resource for those interested in both the biblical ideas of creation and the mythology of the ancient Near East that influenced them.

A Scientific Analysis of the Creation Vs Evolution Debate-Selva Sugunendran 2016-06-03 In this book you will learn about the origins of life, which has been a popular topic of debate for decades, stirring division among groups of people regarding what to believe, whether a higher entity created life (Creation) or a series of cosmic accidents (evolution) led to life developing on earth. I have spent nearly eighteen months researching in order to find the seemingly elusive answers to the questions involving our very origins: Where do we come from? Who or what made usa supreme being, some cosmic event, or both? What should we believe inCreation or evolution? Does it matter what we choose to believe? I have selected thirty most often asked questions on this subject matter and have attempted to answer them by looking at both sides of the argument on creation and evolution fairly and scientifically and without taking sides.

Creation and Chaos in the Primeval Era and the Eschaton-Hermann Gunkel 2006-10-10 Foreword by Peter Machinist Hermann Gunkel's groundbreaking Schöpfung und Chaos, originally published in German in 1895, is here translated in its entirety into English for the first time. Even though available only in German, this work by Gunkel has had a profound influence on modern biblical scholarship. Discovering a number of parallels between the biblical creation accounts and a Babylonian creation account, the Enuma Elish, Gunkel argues that ancient Babylonian traditions shaped the Hebrew people's perceptions both of God's creative activity at the beginning of time and of God's re-creative activity at the end of time. Including illuminating introductory pieces by eminent scholar Peter Machinist and by translator K. William Whitney, Gunkel's Creation and Chaos will appeal to serious students and scholars in the area of biblical studies.

Creation Vs Evolution-Selva Sugunendran 2015-09-18 In this book you will learn about the origins of life, which has been a popular topic of debate for decades, stirring division among groups of people regarding what to believewhether a higher entity created life (the Creation) or a series of cosmic accidents (Evolution) led to life developing on Earth. In this book, Ill try to find the seemingly elusive answers to the questions involving our very origins:

Where do we come from? Who or what made usa supreme being, some cosmic event, or both? What should we believe in, the Creation or Evolution? Does it matter what we choose to believe? Gods "Literal" Plan of Creation - Vs.- the Great Satan Generation of Viper-Jack Hall 2010-08-04 The Holy Bible is the figurative allegory of Gods creation. It was only fitting that in a dual heaven and earth unity of object and subject that both the literal translation of the word as well as the figurative be combined in the only absolute truth known to man. This inspired revelation was nullified by the 15th century age of science which will bisect creation, closing the subjective curtain to heaven and placing Big Bang upon Gods vacated throne. This will turn creation inside out unleashing the great Satan viper to adulterate freedom in its constraint of earths fiery genesis of chaos. America will become an immoral cesspool script to a deceptive liberal and progressive mindset of a false utopia unattainable on imperfect earth. This book cries out to the Tea Party freedom loving patriot to rid the scourge now overtaking the land.

Creation and Contingency in Early Patristic Thought-Joseph Torchia., O.P. 2019-04-10 This book assumes an interdisciplinary character, providing a window into the subtle relationship between faith and reason in early patristic thought and its relevance for forging the doctrine of creation ex nihilo. In so doing, it highlights the extent to which early Christian thinkers found a common ground with the Greek philosophical tradition.

The Battle for the Beginning-Dr John F MacArthur, Jr 2003-02-18 MacArthur writes that when naturalistic and atheistic presuppositions are being aggressively peddled as if they were established scientific fact, Bible-believing Christians "ought to expose such lies for what they are and oppose them vigorously." With this book readers can find answers to the tough questions and learn what the Bible says about how our universe began.

In the Beginning-Joseph Cardinal Ratzinger 1990-01-01

The Genesis Debate-Ronald F. Youngblood 1986 Essays present opposing viewpoints concerning the Creation, evolution, the Trinity, Cain and Abel, Adam and Eve, angels, the flood, and capital punishment

Genesis, Creation, and Creationism-Lloyd R. Bailey 2006-05-28 'Genesis, Creation, and Creationism' is an important new study that explores all sides of the creationism debate and gives a sound and spiritually rich way of understanding the creation stories of Genesis. ----- Creationism is an ardently proclaimed and widely held point of view, involving both scientific and biblical data. While much has been written about Öscentific creationism, much less is available about its counterpart, Öbbical creationism.' Genesis, Creation, and Creationism' provides this much-needed evaluation of creationism by uniquely allowing the Bible to speak for itself. Author Lloyd R. Bailey, who is a biblical scholar and also holds a degree in physics, begins his investigation by inviting all sides of the creationism debate to set aside their prejudices for or against the theory of evolution and read the biblical story of creation in Genesis (1:1-2, 4a). He then examines the creationist phenomenon and compares this data with the agenda of the Oyungue earth creationist. All the while, Bailey enhances the Bible's ability to speak for itself by withholding judgment on many of the assumptions of historical-critical biblical scholarship (for example, the date and authorship of Genesis). The result is a scientifically straightforward study of Genesis that explicitly answers fundamentalist questions on creationism.' Genesis, Creation, and Creationism' is a thought-provoking study on the relationship of science and religion that speaks to all Christian denominations. It provides excellent resource material for high school science classes, religion classes, and for seminarians engaged in biblical studies.

Creation and Fall-Dietrich Bonhoeffer 2004-01-01 Creation and Fall originated in lectures given by Dietrich Bonhoeffer at the University of Berlin in the winter semester of 1932-33 during the demise of the Weimar Republic and the birth of the Third Reich. In the course of these events, Bonhoeffer called his students to focus their attention on the word of God the word of truth in a time of turmoil.
